### **About Simone**

The Simone Group, founded in 1968, is the custodian of a unique legal heritage. Predominantly proprietary, updated on a daily basis and complete with current legislation, case law and authored content, it is progressively being transformed into a structured legal dataset through the proprietary Simone LexCore platform: this infrastructure enables content distribution through B2C digital database subscriptions, integration into third-party software and platforms via APIs, and the supply of data for Legal AI and machine learning applications.

This heritage supports the Advanced Legal Training business delivered through Dike Formazione, accredited by the Scuola Nazionale dell'Amministrazione (SNA), with content, methodologies and training programmes aimed both at key Public Administration professionals and at companies and professionals operating in public procurement markets, positioning itself in a segment characterised by the presence of few truly structured private operators. At the same time, it constitutes the foundation of the Group's historical business in competitive examination publishing, a sector from which the Group derives its experience and established reputation.

Simone is also active in children's publishing, with European initiatives aimed at building a platform of high-quality content and supporting international growth in the sector, and in educational publishing, with a selective and organic approach aimed at enhancing market opportunities in a targeted way.
