HARVEY CHOOSES SIMONE GROUP CONTENT TO ENRICH ITS LEGAL AI PLATFORM

The partnership integrates Il Foro italiano, Dike Giuridica's journals and commentaries, expanding the document base available to platform users

Naples, 30 October 2026

Simone (SMN:IM) announces a **partnership agreement with Harvey**, an international operator in artificial intelligence applied to law, to integrate Simone Group legal content into the Harvey platform.

The agreement covers the **supply of digital content from Il Foro italiano, Dike Giuridica's journals, and annotated codes**. It expands the document base available on the platform with legal scholarship, legal sources, and specialist in-depth analysis. The supply also includes a daily update service with commentary on Court of Cassation rulings, published the same day they are filed.

Harvey's decision to also integrate Dike Giuridica's journals and commentaries highlights the value of the Simone Group's editorial heritage and the distinctiveness of its scholarly content. In-depth analysis sits alongside the legal sources, enriching the resources searchable through AI tools built for legal professionals.

Access to legal scholarship and specialist content, with publication updates delivered on the timelines set by the agreement, widens the platform's document offering and supports access to qualified, current editorial resources.

The agreement also allows the partnership to grow over time, as it includes options to add further supplies, subject to the contractual terms. Together, these elements outline a collaboration that can evolve, with **opportunities to further expand the editorial content made available through the platform.**

The partnership fits the Simone Group's strategy of leveraging its content through new distribution channels and technology applications, extending its reach and developing commercial opportunities in AI applied to law. It joins other partnerships that have made the Simone Group an authoritative and essential voice in supporting the development of Italy's entire legal AI ecosystem.

Luca Misso, CEO of Simone: *"This new partnership with Harvey shows how concretely our business model is evolving. Legal publishing was long seen as a trade doomed to lose out to technological change. Today, more than ever, it offers everything AI needs to become a real tool for supporting legal work. Commentary, updates, rigorous sources, and editorial direction and selection are indispensable for anyone working in law. At the same time, the Group has always invested in technology, which now lets us make our content available to any software platform, so we can stay true to our original mission: to concretely support the study, analysis, and application of the law."*

Nate Schlein, Head of Product Business Development of Harvey: *"By working with the best Italian firms and legal departments, it taught us that great legal AI has to reflect how Italian lawyers reason, and that means doctrine alongside legislation and case law. Partnering with Gruppo Simone brings that depth into Harvey, so our Italian users get answers grounded in the sources they already trust and cite."*

Harvey is the operating system for legal and professional services. Our products streamline workflows in areas including contract analysis, due diligence, compliance, and litigation to drive efficiency and value. Law firms and legal teams around the world use Harvey to enable faster, smarter decision-making. Backed by world-class investors including Sequoia, Kleiner Perkins, a16z, Coatue, EQT, GIC, GV, Goldman Sachs Alternatives, J.P. Morgan, Lightspeed, and the OpenAI Startup Fund, Harvey is used by 3,500+ customers in 85+ countries.

About Simone

The Simone Group, founded in 1968, is the custodian of a unique legal heritage. Predominantly proprietary, updated on a daily basis and complete with current legislation, case law and authored content, it is progressively being transformed into a structured legal dataset through the proprietary Simone LexCore platform: this infrastructure enables content distribution through B2C digital database subscriptions, integration into third-party software and platforms via APIs, and the supply of data for Legal AI and machine learning applications.

This heritage supports the Advanced Legal Training business delivered through Dike Formazione, accredited by the Scuola Nazionale dell'Amministrazione (SNA), with content, methodologies and training programmes aimed both at key Public Administration professionals and at companies and professionals operating in public procurement markets, positioning itself in a segment characterised by the presence of few truly structured private operators. At the same time, it constitutes the foundation of the Group's historical business in competitive examination publishing, a sector from which the Group derives its experience and established reputation.

Simone is also active in children's publishing, with European initiatives aimed at building a platform of high-quality content and supporting international growth in the sector, and in educational publishing, with a selective and organic approach aimed at enhancing market opportunities in a targeted way.
